

Y1 One More One Less

KS1 Y1 Maths · Follows the national curriculum

Name _____ Class _____ Date _____

1. Worked example

What is one more than 8?

Step 1 · One more means the next number when we count on
8, then ...

Step 2 · Say the next number
9

Answer: One more than 8 is 9

Check: 8 cubes add 1 cube makes 9 cubes.

2. Now try one with the steps

What is one less than 15?

Step 1 · One less means the number just before, when we count back

Step 2 · Say the number before

Answer:

3. Practice

Have a go at each one. There is space underneath to work it out.

1. What is one more than 4?

2. What is one less than 7?

3. What is one more than 10?

4. What is one less than 12?

5. What is one more than 17?

6. What is one less than 1?

7. What is one more than 19?

8. What is one less than 30?

9. What is one more than 56?

10. What is one less than 81?

11. What is one more than 99?

12. I am one less than 50. What number am I?

13. Tom has 13 conkers. He finds one more. How many conkers does he have now?

14. Amara is thinking of a number. One more than her number is 25. What is her number?

4. Before you hand it in

Thinking one less than 6 is 7.

Use a cube tower: one more = add a cube, one less = take a cube away.

Saying one more than 29 is "twenty-ten".

One more than 29 is 30. One more than 59 is 60.

Saying one less than 40 is 49 or 30.

One less than 40 is 39. Check on a hundred square.

Changing the tens digit instead of the ones (one more than 34 is 44).

One more only changes the ones, unless the ones are 9.
