Y2 Numbers In Words

KS1 Y2 Maths · Follows the national curriculum

Name _____ Class _____ Date _____

1. Worked example

Write 36 in words.

Step 1 · 3 tens is thirty

thirty

Step 2 · 6 ones is six. Join them with a hyphen

thirty-six

Answer: thirty-six

Check: Thirty (30) and six (6) make 36 ✓

2. Now try one with the steps

Write "seventy-two" in numerals (digits).

Step 1 · Seventy means 7 tens

Step 2 · Two means 2 ones

Answer:

3. Practice

Have a go at each one. There is space underneath to work it out.

1. Write "twenty-five" in numerals.

2. Write "sixty" in numerals.

3. Write "forty-eight" in numerals.

4. Write "eighty-one" in numerals.

5. Write "seventeen" in numerals.

6. Write 50 in words.

7. Write 23 in words.

8. Write 99 in words.

9. Write "one hundred" in numerals.

10. Write 44 in words. Be careful with the spelling!

11. Which is bigger: "thirteen" or "thirty"? Write the number.

12. Write in numerals: the number that is one more than "fifty-nine".

13. Write in numerals: the number that is ten less than "seventy-four".

14. Hassan wrote "sixty-two" as 26. What should he have written?

4. Before you hand it in

Writing "sixty-two" as 26.
The tens word comes first, so the tens digit comes first: 62.

Spelling forty as "fourty".
Learn it special word: f-o-r-t-y.

Mixing up teen numbers and tens numbers, like fourteen and forty.

"-teen" means 1 ten and some ones (14). "-ty" means that many tens (40). Say them clearly and listen for the ending.

Writing "seventy-three" as 703.

70 + 3 = 73. A 2-digit number only has two digits.
